

Evergreen Haat

.....For clean and green Earth

Areca Leaf Products

Overview

Evergreen Haat is an emerging frontier in the eco-friendly products industry. Our main concept is to keep the earth **Evergreen** and we focus on reuse, recycle the natural products.

The aim of our organization is to maximize the use of green products and to bring about awareness in the society magnifying the importance of going green and to minimize the use of toxic plastic and thermocol products. We are constantly endeavouring to find newer, better products that are closer to earth, bio-degradable, compostable, nontoxic, chemical-free, and safer for environment, earth, animal world, and mankind.

Background

Every year thousands of tons of waste is generated due to use of disposable tableware made from Plastic and Styrofoam. Plastic has entered everywhere in humans life such as bottles to drink water, plates to eat food, bags to carry items, jars of personal care products, containers to store foods, and this list is endless. Plastic pollution is one of the greatest environmental challenges of our time. The theme for **World Environment Day 2018 - Beat Plastic Pollution** shows the emergence of every individual to say **No to plastic**. Going green should be every organisation's and individual's thought process. It is the responsibility of every citizen on this earth to ensure it happens.

Challenges

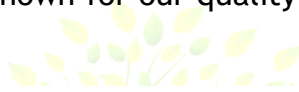

The challenge to end-of-life of plastic today is a global concern. They do not degrade or compost for hundreds of years. The thousands of tonnes of disposable plastic that is generated as waste every day causes a lot of hardship and misery to man, animals, and marine life. Several countries have banned use of plastics. Many more needs legalisation to move towards alternate products. Most importantly every individual needs education on this issue.

Although, it is not possible to go green overnight, as plastic has permeated into every aspect of our life being cheaper and easily available. But every individual should reduce use of it and start using items made from biodegradable materials. We need to change our choices to save our planet from choking on plastic. It is **Now the high time to go green**.

Our team

For constituting error free range of products we rely on our remarkable team treasured with excellence. Resources are deployed with diligence so that minimum wastage takes place with maximum profitability. Under our skilled workforce, we are able to maintain cordial industrial relations and effective grievance mechanism.

Quality parameters are set to assure that production is carried out to customer satisfaction. Quality standards are periodically updated. We deliver our clients with realistic quality promises. We believe that it is our duty to convert their quality expectations into reality. Our Qualities Cells have assisted us to maintain quality at every production stage. To deliver quality products at right time in right condition is our endeavour. We are able to satisfy our client through our high-quality benchmarks. Our strength lies in the fact that we understand the basic needs of clients and provide service accordingly. We are known for our quality, efficient pricing, and commitment to quality standards.

Our team mainly comprises of-

- Farmers
- Machine Labourers
- Quality Inspectors
- Sales & Marketing Executives
- Packers & Warehouse & Logistics Staff

Together, we work to produce a whole satisfying experience for all our valued customers.

Market Presence

Evergreen Haat has grown phenomenally since its inception. With wide requirements and changing needs of consumers, **Evergreen haat** has wide list of clients. Starting as a small unit in small town in Karnataka, now we have grown to be leading manufacturer of Areca Plate Making Machines giving livelihood to hundreds of young men and women in rural areas. We have our manufacturing base at Karnataka (India) and an operational marketing unit at Bangalore and Noida(NCR) to cater for the growing demand. With centralized system of working, we deliver our green products to every part of India and world.

With growing awareness and consumerism we have strong export market and our products also available on online sites.

Our Products

- The need of the hour is to make products that are biodegradable and/or can be easily recycled for future use.
- Our dinnerware are made from the shredded leaves of the Areca Palm tree and **No trees are chopped** or cut at any stage during the making process.
- We continue to be true to the earth by using **rural by-product** i.e. fallen leaves - that we borrow (and often save from being burnt) and then return to the earth.
- Our dinnerware are **100% free of chemicals**, lacquers, glues, bonding agents or anything toxic, dyes, or resins that keeps your food and our earth free from harm.
- Stylish yet functional, these areca leaves products are made using premium quality, naturally fallen palm leaves. They are a great alternative to the typical disposable plastic dinnerware. Instead of coming from a factory, palm dinnerware is **handcrafted** to ensure you get the best product possible.
- By choosing areca leaf products, you get an **Eco-friendly** product that is 100% **biodegradable** and **compostable**. Within 2 months, the leaves will have composted fully. Each palm leaf is **completely hygienic**.
- Areca leaf products are **oven safe**, microwavable and grease resistant, making palm the perfect choice for any culinary occasion. Whether you're serving hot pizza straight from the oven or cold ice cream, palm is tough enough to handle a variety of temperatures. It's extraordinarily durable and resists cracks, breaks, and leaks. Can hold liquid for 6 to 8 hrs.
- Areca leaf plates feature a strong, durable design making them ideal for weddings, cocktail parties, BBQs, picnics, and much more. Regardless of what's on the menu, palm bowls are perfect for any culinary occasion since they offer a unique combination of durability and environmental-friendliness.

Uses

- Sturdy and light which makes it possible to use in buffet parties.
- Used as dinnerware in Functions, restaurants, birthday parties, kitchenware.
- Used for packing purposes.
- Can be used in microwave for warming food.

Advantages

- Areca leaf plates cups, plates, bowls are Biodegradable
